

Agenda

- Progress report
 - MVP deployed - yay!
 - Locu API keys
 - Knockout.js
 - Summary of task list
- Pick framework
- Finish task list
- Discuss revisions to design doc

Progress Report

- **Milestone:** MVP deployed!
 - The MVP is live and functional. Recommendations work reasonably well.
- **Difficulty:** Locu API key gets forbidden after too many requests
 - Be wary of it, and change API keys if it happens
 - Harihar has two API keys, and there's a group API key
- **Milestone:** Looked into Knockout.js
 - Unobtrusive
 - Very easy to learn (tutorial just took two hours)
 - HTML, no weird templates
 - Possible **Change to Design:** Should we use Knockout?
- **Milestone:** Wrote task list for remaining tasks. It is on the Google drive.
